

Alpha Hours

A profitable after-school business unit inside Alpha buildings, built for the families who will never enroll at Alpha.

\$4,500

a session, \$22,500 a year, about a third of Alpha tuition

NYC first

Oct 19, 2026; Greenwich and Boston S3; Chicago and Florida S4; national Fall 2027

\$101M

run rate at capacity from Session 4, nine campuses

\$28.2M

Year 1 net on the plan case, \$39.9M at capacity

83%

site margin at capacity, break-even 15 students a campus

11,908

children on Timeback after school at full-network capacity

THE IDEA

The Alpha day, after school: 100 minutes a week of mastery academics on Timeback and 80 minutes of life skills, in the Alpha building down the street, sold to every family in the city who will pay for it. Most of them will never apply to Alpha and never need to. They love their school, they will not pay \$40,000 to \$75,000, they live too far, or they were told not yet. They will pay \$4,500 a session for the Alpha day after school, for as long as their child is in K-8.

It does four things at once: **a business unit that makes money on its own, buildings that stop going dark at 3:30, a market Alpha has never sold to, and, as upside, a paid, data-rich path into full-time Alpha.**

HOW IT RUNS

- **The block starts where the school day ends.** Weekdays 4:00 to 6:00 pm, Monday/Wednesday or Tuesday/Thursday, or one four-hour Saturday block. Four cohorts share every room, so enrolled is four times the seats.
- **Five seven-week sessions a year, sold one at a time,** \$500 deposit, no application. Every session ends with an AlphaTest Showcase in front of the parents, the same week they receive the child's mastery map.
- **One guide per ten seats, hired to sold seats.** Snacks, Alpha bucks and the Emporium, and the showcase are all in the cost model at \$435 a child a session.
- **Priced against Alpha tuition, not Kumon.** \$4,500 a session, \$22,500 a year, about a third of Alpha. Proven: 174 paid Hamptons registrations at \$4,500 a week, one price objection.

WHO PAYS

Stay, 70 percent: families who will never enroll. The business, \$71.0M a year at full pilot capacity, re-enrolling five times a year for years. **Considering, 15 percent** and **Path to yes, 5 percent:** the upside, conversion modeled at 4 to 8 percent of all enrolled and worth \$160K to \$325K each in lifetime tuition. **Current Alpha families, 10 percent:** the base load, at 5 percent off.

THE MARKET

US families spend about **\$40B a year** on tutoring and after-school, about **\$16B** of it in Alpha's metros. The full 40-campus network at capacity is 1.7 percent of that. The constraint is buildings, not demand. In NYC, 3 of 23 recent admissions conversations asked for after-school unprompted.

THE NUMBERS

	S2: New York	S3: + Greenwich, Boston	S4 and S5: + Chicago, Florida
Campuses	2	5	9
Seats / enrolled	130 / 520	350 / 1,400	1,127 / 4,508
Revenue run rate	\$11.7M	\$31.5M	\$101.4M
Site profit (margin)	\$9.6M (82%)	\$25.8M (82%)	\$84.3M (83%)

Year 1 (Sessions 2 to 5): plan \$35.4M revenue, \$28.2M net, leaving Session 5 at an \$82M run rate; capacity \$49.2M / \$39.9M; floor at 25 percent fill all year \$12.3M / \$8.6M. Break-even is 15 students a campus. The New York launch budget, about \$141K, is covered by Session 2 deposits, and every later step is paid from the sessions before it.

THE ROLLOUT

Session 2, October 19, 2026: New York only, 180 Maiden Lane (100 seats) and 156 William Street (30). **Session 3, January 4, 2027:** Greenwich (80) and Boston (40 and 100). **Session 4, February 24, 2027:** Chicago at 517, Miami (150), Palm Beach (60), Miami Beach (50). **Session 5:** the nine campuses run a full session with no new openings. **Session 1, Fall 2027: national launch,** Austin and every remaining campus, to about 40 campuses, 11,908 enrolled, \$268M revenue, about \$216M net at capacity. Each step is released by the week-3 checkpoint of the session before it: fill at or above 40 percent, no site below its floor, re-enrollment at or above 60 percent.

TOWARD A BILLION KIDS

A full-time seat reaches one child. An after-school seat reaches four, in a building Alpha already pays for, sold to families who will never change schools. At capacity the network puts 11,908 children on Timeback after school, more than Alpha enrolls full-time today, without a single new lease.

THE TEAM

Head of Alpha Hours \$400K, owns the P&L. Operations and Admin VP \$200K, remote. Per campus: Lead Guide \$75K, Campus Coordinator \$50K (half role), guides \$50K part-time, trained at Alpha NYC. Fixed cost per campus \$188K.

THE ONE-SENTENCE CASE

Alpha Hours turns empty Alpha buildings into a profitable, premium after-school business built for the families who will never enroll at Alpha, which is most of them, and hands the school a paid, data-rich admissions channel as the upside.

THE ASK

Approve the New York launch for Session 2, the pre-committed step-by-step rollout and decision rule, and name Nancy Wisniewski Torvund Head of Alpha Hours.
